Heart Failure Summit

CME and CNE CREDITS Offered!

LEARNING OBJECTIVES

At the end of this presentation the participant should be able to:

- Comfortably and empathetically initiate conversations about goals of care
- Easily use and apply prognostic indicator tools to assist them to identify patients who may not be well-served by continued efforts to prolong life in preference to an emphasis on comfort and prevention of suffering
- Understand how hospice can benefit patients with end stage illness and their families
- Review understanding for pathophysiology of Heart Failure
- Identify evidence base practice for early diagnosis and risk stratification for the heart failure patient
- Discuss evidence based practices to improve knowledge of Heart Failure care and management
- Discuss the role, benefits and complications of device therapy in heart failure management
- Identify selection criteria and recognition of patients who may benefit from device therapy
